

Minimum feed-in tariff review 2021-22

Submission received through Engage Victoria

Date submitted: 5 January 2020

Submission written by: Anonymous

From 17 November 2020, we began accepting submissions on our Minimum feed-in tariff review 2021-22 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

Your comments on this draft decision:

I have lost thousands of dollars with my solar system. The meter last only 5 years.and it cost \$800 to replace. I get 6 cents for feed in. This is a total loss making idea. The problem with the price we pay for electricity is in the way some companies count useage. They count a daily useage instead of start reading and end reading to get total useage for the 3 months. This is how I get charged double for what I really use. ,They say that is how the smart meter is read .{24 hours a day, with daily totals,and not start and end reading.}When it comes to solar ,the start and end is calculated. so yo get a few \$ for 3 months
