Subject: AusNet Infrastructure No.1 Pty Ltd - licence application

AusNet Infrastructure No.1 Pty Ltd - licence application

“AusNet Infrastructure No.1 Pty Ltd is seeking a licence to transmit electricity through the connection and extension assets associated with a Battery Energy Storage System in Koorangie, Victoria (Koorangie BESS), including a new Kerang Terminal Station in Bael Bael, Victoria. The terminal station, positioned between the existing Wemen Terminal Station and Kerang Terminal Station line, will connect the Koorangie BESS to the Victorian Transmission Network.”

.....

Dear Essential Services Commission,

I Object to the Approval of a Licence for AusNet Infrastructure No.1 Pty Ltd due to the fact that they will NEVER meet the objectives of the Essential Services Commission - who state that:-

“We must have regard to our objectives when deciding whether to grant or refuse a licence application.

***This includes promoting the long-term interests of Victorian consumers with respect to the price, quality and reliability of essential services.**”**

AusNet Infrastructure No.1 Pty Ltd does not have the

· technical capacity to comply with the conditions of the licence, does not have the capacity to operate and manage the business, will not comply with licence conditions, nor comply with relevant regulatory obligations regarding their “seeking a licence to transmit electricity through the connection and extension assets associated with a Battery Energy Storage System in Koorangie, Victoria (Koorangie BESS), including a new Kerang Terminal Station in Bael Bael, Victoria. The terminal station, positioned between the existing Wemen Terminal Station and Kerang Terminal Station line, will connect the Koorangie BESS to the Victorian Transmission Network.”

This failure is due to the predatory, greedy, profiteering actions of AusNet, other Networks & Energy Companies who are deliberately manipulating the market - AGAINST THE BEST INTERESTS OF AUSTRALIA - ripping off Electricity Consumers - through the totally flawed, unreliable, intermittent, weather dependent, astronomically costly, Fake Green RenewaBULL Solar/Wind Energy Poverty Grift & Ponzi Scheme/Scam.

AusNet Infrastructure No.1 Pty Ltd are beholden to Chinese Communist Party Control through their financial arrangements & have NO ALLEGIANCE TO AUSTRALIA AU

It is essential to have an immediate Moratorium & Independent Federal Inquiry/Royal Commission - including a comprehensive Audit to determine which Networks & Energy Companies are subject to the CCP's National Intelligence Law & accurately clarify who their finances are beholden to.

It appears that the plethora of Transmission Licences being suddenly sought & consequential power & control being wrongly handed over by ESC for Compulsory Acquisition of the private property of numerous rural Australians AGAINST THEIR WILL - WITHOUT CONSENT - WITH NO SOCIAL LICENCE - is being gained purely for anti-Australian controlling purposes, for predatory Network & Energy Company personal/shareholder benefit - NOT FOR THE GREATER GOOD OF AUSTRALIA - as the practical results are the Antithesis of:-

*Caring for Country

*Protecting Nature

*Energy Security

*Economic Prosperity

*Food Security

*National Security.

ESC must  STOP fulfilling China's Energy Dream of Deliberately Weakening Australia with their Pathetic RenewaBULL JUNK & Energy Deprivation.

ESC has completely failed to truthfully include reputable, peer reviewed, independently verified, reputable Engineering Facts, Scientific Rigour, Integrity & Ethics in their decision making & approval processes - with ALL aspects of the National Electricity Law Objective being defied by their present Approvals & Plans.

With Trump's Election in the U.S, he has vowed to Dump the Paris Agreement, the Climate Scam, the Fake Green New Deal & to make America Energy Independent; With a newly Elected Federal Coalition likely to follow suit in Australia, this will result in a plethora of stranded assets & no reliable, affordable power at all if ESC continues their careless licensing, leading us all down the RenewaBULL Road to Ruin!

The devastating, ECOCIDAL RenewaBULL impacts have never been considered by ESC, which is a complete dereliction of duty, as this is a whole of system failure with enormous, detrimental impacts for Intergenerational Equity.

All of the Principles of Ecologically Sustainable Development are being defied as is the Paris Agreement's 'IN A MANNER THAT DOES NOT THREATEN FOOD PRODUCTION.'

There has been no Due Diligence done in accurately assessing the Full Costs, the shameful reliance on cruelly tortured Slave Labour supply chain produced components, the Public Health & Safety Risks nor the extensive Environmental Contamination of our limited, irreplaceable, Life Sustaining Food Resource Land & Vital Water sources - being perpetrated by ESC's Licensing decisions - to such an extent that one can only describe their actions as irresponsibly or knowingly inflicting Moral Hazard on Local Regulatory Authorities & as Gross Negligence: "a

lack of care that demonstrates reckless disregard for the safety or lives of others, which is so great it appears to be a conscious violation of other people's rights to safety.”

The last thing Australia needs is Critical Infrastructure controlled by our most hostile enemy - the Chinese Communist Party's funds!

Already we see dodgy, bullying ElectraNet's 46.56% CCP owned/controlled, insidious & totally unnecessary Project Energy Connect, along with incompetent, deceitful TransGrid bullying their way through S.A & southern NSW with NO care for Australia at all, NO Transparency & NO Social Licence.

Neither is AusNet Infrastructure No.1 Pty Ltd a 'fit and proper' person to hold a licence in Victoria.
