

## GWMWater – Outcomes – 2018–2023

*In this document, the water business provides a summary report of its actual performance against each of its outcome commitments for the 2022-23 reporting year. The business has given itself a “traffic light” rating (green = met target, red = not met, yellow = close or largely met) for its performance on each measure, outcome and an overall rating. The business has provided its own comments about its performance on each outcome and overall.*

### Summary table

Outcome	18-19	19-20	20-21	21-22	22-23
1. Safe and Clean Water <sup>1</sup>	Green	Green	Yellow	Grey	Grey
1.a. Safe Drinking Water <sup>2</sup>	Grey	Grey	Grey	Green	Green
1.b. Clean, Non-Drinking Water – Urban <sup>2</sup>	Grey	Grey	Grey	Red	Yellow
1.c. Clean, Non-Drinking Water – Rural Pipeline <sup>2</sup>	Grey	Grey	Grey	Green	Green
2. Reliable and Affordable Services	Yellow	Yellow	Yellow	Yellow	Green
3. Healthy and Liveable Region	Yellow	Green	Green	Green	Green

<sup>1</sup> Outcome 1 superseded by outcomes 1.a., 1.b. and 1.c. in 2021-22.

<sup>2</sup> New outcome added in 2021-22, previously combined under outcome 1. 'Safe and Clean Water'.  
Essential Services Commission **GWMWater – Outcomes report – 2018–2023**

Overall

## Business comments

The content of and the performance against Outcomes is subject to a continuous feedback loop with customers and stakeholders. Via our biannual Customer and Stakeholder Workshops, customers provide regular feedback about the relevance of both measures and outcomes, as well as which outcomes they feel we need to prioritise.

This report includes updates to measures and outcomes based on feedback received during the development of our 2023-2028 GWMWater Price Submission. The updates are focused on providing a higher level of detail, in terms which are meaningful to the customer, as well as responding to feedback about customer satisfaction and the threshold applied. A key focus for GWMWater over the past twelve months has been the five year pricing proposal with a significant focus on delivering value to our customers.

Our reporting is presented in a summarised, easy to read format for customers and shared with participants of our Customer and Stakeholder Workshops as pre-reading ahead of consultation.

Overall performance has improved this year with areas for improvement in Outcome 3: Clean, Non-Drinking Water – Urban consistent with initiatives identified and planned to be delivered during this regulatory period. This year was one of our wettest years in recent history and as a result, our water resource position is the best it has been since the mid 1990's. The impact of the seasonal conditions can be seen in the performance of some service standards however overall our systems have performed well.

**Outcome 1: Safe and Clean Water – \*Superseded\***

Output	Unit		16-17	17-18	18-19	19-20	20-21	21-22	22-23

Overall outcome 1.a. performance for the regulatory period so far 

### Business comment

1.a.a: Result based on biennial phone survey, with 457 drinking water customers interviewed between 11 May 2023 and 20 June 2023. The result indicates our drinking water customers remain satisfied with our services.

1.a.c: Total number of drinking water quality complaints per 1,000 customers remained stable in 2022/23 with no major aesthetic water quality incidents. There were 49 complaints in total compared to 51 last year.

Refer to the GMMWater 2022/23 Water Quality Annual Report to be published for more information

<sup>4</sup> Note change in output measure from 5 or above to 7 or above. Target has been revised based on change in measure.

<sup>5</sup> Output 1.a.b removed from reporting from 2022-23 following the development of the 2023-2028 GMMWater Price Submission.  
Essential Services Commission **GMMWater – Outcomes report – 2018–2023**

**OFFICIAL**

**OFFICIAL**

1.a.d: A high rainfall event at the end of 2022 resulted in variable raw water quality and colour/organic matter in catchments at the start of 2023. This in turn resulted in trichloroacetic acid exceedance at Ouyen (September 2022) and Great Western (January 2023). Booster chlorination was slightly higher than normal operating levels in January that resulted in a trihalomethane exceedance at Natimuk. Chlorine levels were re-adjusted to within target levels, and the water became compliant again.

**Outcome 1.b.: Clean Non-drinking Water – Urban<sup>6</sup>**

Output	Unit		16-17	17-18	18-19	19-20	20-21	21-22	22-23
a Urban non-drinking water customer satisfaction (rating of 7 <sup>7</sup> or above out of 10) in GMMWater's customer survey	Percentage of survey responses	Target	N/A	N/A	> 80%	> 80%	> 80%	> 80%	> 80%
		Actual	N/A	N/A	71%		69%		81%
b Urban non-drinking water quality complaints	Number per 1,000 customers	Target	N/A	N/A	10	10	10	10	10
		Actual	12.6	13.7	11.7	14.9	19.4	26.5	16.9

Overall outcome 1.b. performance for the regulatory period so far: 

**Business comment**

1.b.a: Result based on biennial phone survey, with 59 non-drinking water customers interviewed between 11 May 2023 and 20 June 2023. There was a 12% improvement in overall satisfaction since the last survey.

1.b.b: There were 42 complaints in total in 2022/23 compared to 76 last year, 45% decrease. Previous year was impacted by a water quality event at Elmhurst. Performance this year is back in line with average level of complaints however exceeds target.

The program in the 2023-2028 GMMWater Water Price Submission was developed based on customer feedback and includes a number of initiatives aimed at reducing the level of dissatisfaction amongst non-drinking urban water customers.

<sup>6</sup> Previously combined with 'Safe Drinking Water' Outcome under 'Safe and Clean Water'. Outputs have also been separated into urban non-drinking and rural pipeline.

<sup>7</sup> Note change in output measure from 5 or above to 7 or above. Target has been revised based on change in measure.

**Outcome 1.c.: Clean Non-drinking Water – Rural Pipeline<sup>8</sup>**

Output	Unit		16-17	17-18	18-19	19-20	20-21	21-22	22-23
a Rural pipeline (non-drinking) water customer satisfaction (rating of 7 <sup>5</sup> or above out of 10) in GWMWater's customer survey	Percentage of survey responses	Target	N/A	N/A	> 80%	> 80%	> 80%	> 80%	> 80%
		Actual	N/A	N/A	80%		92%		89%
b Rural pipeline (non-drinking) water quality complaints	Number per 1,000 connections	Target	N/A	N/A	5	5	5	5	5
		Actual	1.8	2.7	4.1	1.2	3.1	3.0	3.6

Overall outcome 1.b. performance for the regulatory period so far: 

**Business comment**

1.c.a. Result based on biennial phone survey, with 123 rural pipeline water customers interviewed between 11 May 2023 and 20 June 2023.

1.c.a. and 1.c.b. Compared to urban non-drinking and rural licencing services, rural pipeline supplies are more valued by customers and meet customers' expectations for domestic, farming or intensive commercial uses.

<sup>8</sup> Previously combined with 'Safe Drinking Water' Outcome under 'Safe and Clean Water'. Outputs have also been separated into urban non-drinking and rural pipeline. Essential Services Commission **GWMWater – Outcomes report – 2018–2023**

Commented [DM(1)]: GMMW to provide before we publish outcomes on website

Overall outcome 2 performance for the regulatory period so far:

## Business comment

Service standard performance overall performed well considering the exceptional wet seasonal conditions experienced during 2022/23. Also of note during 2022/23 was the increase in focus on supporting customers in the GMMWater Customer Support Program and increase in hardship grants provided.

2b New output measure developed during the development of the 2023-2028 GMMWater Water Price Submission. Reporting currently being established commencing from 1 July 2023.

<sup>12</sup> In the reporting years before 2021-22 was output 2b.

<sup>13</sup> In the reporting years before 2021-22 was output 2c

<sup>14</sup> New output added in 2022-23

**OFFICIAL**

**OFFICIAL**

2b to 2q: Service standard performance has been separated into individual standards under each charter to provide more detailed information on overall performance. Our ongoing renewals and maintenance programs continue to be targeted to focus on priority areas.

GWMWater's Service Standards are published in the Urban Customer Charter and Rural Customer Charter, and can be found at <https://www.gwmwater.org.au/about-us/about-gwmwater>.

For a detailed report on GWMWater performance against these standards and to see how these and other indicators compare to other water business across Victoria, refer to the Water Industry Performance Report published by the Essential Services Commission at <https://www.esc.vic.gov.au/water/sector-performance-and-reporting/water-performance-reports#tabs-container2>.

### Business comment

3a: 423 organisations including schools received recreation water discounts in 2022-23. Recreation water discounts are funded through a recreation contribution charge collected from residential and rural households and is reported in GWMWater's Annual Report.

3b: New measure introduced to monitor and maximise the utilisation and value of financial and environmental benefits from our investments in renewable energy. Further opportunities to increase the percentage of self-generated renewable energy used in operations are being investigated.

3d: Gross carbon emissions decreased from 17,065 Tonnes CO<sub>2</sub>-e in 2021/22 to Tonnes 13,509 CO<sub>2</sub>-e in 2022/23 which represents a total decrease of 21% or 3,556 Tonnes CO<sub>2</sub>-e.

For further information including breakdown of the source and trend in carbon emissions refer to GWMWater's Annual Report available at <https://www.gwmwater.org.au/about-us/annual-reports>

3e: Recycled water use was close to target in 2022-23.

3f: Metering programs for our bulk entitlements are being revised and amended for submission to the Minister for Water by October 2023.

**OFFICIAL**

**OFFICIAL**

3h: Both urban and rural level of unaccounted water exceeded target this year. Results have been impacted by some major breaks experienced during the year, in particular on the South West Loddon pipeline, and issues with the accuracy of some bulk meters identified to be recalibrated or replaced.
