

Minimum feed-in tariff 2023-24

Submission received through Engage Victoria

Date submitted: 20/12/2022

Submission written by: Owen Carlton

From December 2022, we began accepting submissions on our Minimum feed-in tariff review 2023-24 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the minimum single and time-varying feed-in tariff rates do you consider are appropriate?

All of them.

What parts of our proposed methodology should we change?

The Amount of Money, people who have Invested in Solar Panels, should receive for Power generated from their Solar Panels, that is assisting the Grid.

For our overall methodology, or parts of it, what alternative methodologies should we consider?

I am a Ex Service Veteran and Aged Pensioner and I installed Solar Panels, to Save and Make Money, to boost my meagre Finances. Myself and Others like me, are NOT getting the full benefit of what we Invested in Solar Panels. With the amount we receive, diminishing, this action is Destroying our Investment. Thieves come to mind.
