

Minimum feed-in tariff 2023-24

Submission received through Engage Victoria

Date submitted: 21/12/2023

Submission written by: Richard Howard

From December 2022, we began accepting submissions on our Minimum feed-in tariff review 2023-24 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the minimum single and time-varying feed-in tariff rates do you consider are appropriate?

Your methodology fails to address the main problem. If i invest Thousands of Dollars based on a published feed in Tariff that tariff should stay for 20 Years. You should only change it for "new" instillations.

What parts of our proposed methodology should we change?

see above

For our overall methodology, or parts of it, what alternative methodologies should we consider?

You should stop promoting use of electricity at the wrong time - "night rates" are lower when they should be higher? Off peak is not encouraged Vic website flawed as it assumes behavior (usage patten) will not alter if price incentives are given
