

Minimum feed-in tariff 2023-24

Submission received through Engage Victoria

Date submitted: 20/12/2023

Submission written by: adrian mcgrotty

From December 2022, we began accepting submissions on our Minimum feed-in tariff review 2023-24 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the minimum single and time-varying feed-in tariff rates do you consider are appropriate?

the whole FIT is bullshit, absolutely no incentive to install solar panels.

What parts of our proposed methodology should we change?

all of it.

are you for real with the time based figures, solar only produces in daylight no use getting 10 c/kw at 10pm at night. what a joke.

For our overall methodology, or parts of it, what alternative methodologies should we consider?

cost of living, look after the customers not the providers.
