Dear Mr FIT review

I would like to object to the paltry proposal of a FIT of 0.04c/kwh. Yes home owners install solar panels to gain the benefit of using electricity they produce, but there needs to be some recognition for the electricity they feed into the grid for use by others, and the benefit they give to reaching zero carbon. Home owners with solar panels should not be asked to donate their excess production to the energy providers for essentially no recompense.

Regards
